

PROFESSIONAL SUMMARY

IT Business Analyst and Statistics graduate building AI-powered web and desktop applications, internal business systems, and analytics products. Experienced in translating operational needs into practical technical solutions across ASP.NET Core, React, TypeScript, C#, WPF, Python, R, R Shiny, machine learning, statistical modelling, automation, and data-driven product development.

EDUCATION

Middle East Technical University, Faculty of Arts and Science

B.S. in Statistics

Cumulative GPA: 2.92/4.0 | Honors: Dean's List (3 semesters)

Ankara, Türkiye

09/2019 – 06/2025

EXPERIENCE

IT Business Analyst

TPF Ingenieria Türkiye

November 2025 – Present

Ankara, Türkiye

- Build internal digital platforms at the intersection of business analysis, full-stack development, and process automation to standardize workflows and support data-driven decisions.
- Developed **TPF SILMARIL**, a centralized application portal and identity management hub with single sign-on, role-based access, secure session handling, user management, and personalized application catalogs.
- Architected **TPF-EDU**, a corporate learning management platform with course catalogs, interactive course delivery, quizzes, automated certificates, learner dashboards, and admin analytics.
- Delivered a **Performance Evaluation System** for HR, managers, and employees, including competency libraries, weighted scoring templates, evaluation cycles, multi-evaluator assignments, reporting, and performance analytics.
- Built **TPF Accounting Hub** and **TPF Payroll Management** to automate invoice extraction, credit-card statement tracking, payroll calculations, Turkish tax/SGK compliance checks, Excel import/export, audit trails, and monthly reporting.

Management Analyst (Data Scientist)

Presidency of The Republic of Türkiye Human Resources Office

October 2024 – May 2025

Department of Assessment and Evaluation

- Optimized large-scale R data-processing workflows for the National Internship Program by refactoring and parallelizing algorithms, reducing runtime from 48 hours to 30 minutes.
- Developed and deployed R Shiny applications for AI exposure analysis and structured job-evaluation workflows, including backend, authentication, Shiny Server, Nginx, and Ubuntu Server components.
- Built AI Exposure and Substitution Score models, benchmarked ChatGPT and Claude outputs against expert-labeled datasets, and created analytical dashboards for occupational risk assessment.
- Delivered a Streamlit neural-network application for automated job family and subgroup classification and conducted feature-selection analysis for internship-offer prediction.
- Implemented Selenium-based scraping tools for automated extraction of dynamic web content from multiple sources.

Data Science Intern

Presidency of The Republic of Türkiye Human Resources Office

June 2024 – September 2024

Department of Assessment and Evaluation

- Built a Python/Selenium pipeline to monitor Kariyer Kapısı job postings, extract structured role information, and load results into a multi-table MySQL database.
- Performed multivariate analysis on 2020–2024 National Internship Program data and translated findings into stakeholder-facing insights.
- Scraped and structured detailed data on 1,000+ O*NET job groups and produced a research-based report for the **Structured Job Analysis in Public Sector** project.

Corporate Banking Intern

Denizbank Capital Regional Directorate

August 2023

Corporate Banking

- Supported corporate credit evaluation by analyzing liquidity, profitability, leverage, repayment capacity, collateral quality, and cash/non-cash loan portfolios exceeding 200M; built Excel/VBA amortization schedules and loan-evaluation models.

- Developed an AHP-based multi-criteria decision-making framework to rank public investment projects across five sub-sectors, authored the MCDM prioritization report, and identified Transportation Investment System data-quality gaps.

SELECTED PROJECTS

Machine Learning-Based Football Player Position Classification	April 2025 – June 2025
Designed a Python/R sports analytics pipeline for 2,689 footballers with 120+ performance metrics, engineered PCA-based indicators, tested Logistic Regression, Random Forest, ANN, XGBoost, and SVM, and selected the strongest model for position classification.	
AI Exposure Analysis for Job Activities	December 2024 – March 2025
Built an R Shiny assessment application for occupational AI exposure, covering job activity ranking, substitution/augmentation potential, social acceptability, AI tool categories, exposure timelines, and structured Excel exports.	
Matching Qualified Interns with Employers	October 2024 – March 2025
Conducted feature-selection analysis on National Internship Program data to identify competencies influencing internship-offer outcomes; compared Logistic Regression, Random Forest, XGBoost, and Lasso models.	
Statistical Analysis of Music Listening Behaviors Among METU Students	November 2022 – January 2023
Led a survey-based study with 409 students across 37 departments and analyzed listening behavior, academic performance, and psychological effects using R, ANOVA, chi-square tests, regression, and data visualization.	

SKILLS

Programming & Frameworks: C#, ASP.NET Core, .NET, WPF, React, TypeScript, JavaScript, Vite, HTML, CSS, Python, R, R Shiny, Streamlit, Django

Data Science & AI: Machine Learning, Deep Learning, Statistical Modelling, scikit-learn, TensorFlow, PyTorch, Keras, Feature Selection, Data Visualization, Sports Analytics

Databases & DevOps: PostgreSQL, MySQL, SQLite, Docker, Nginx, Ubuntu Server, Git, GitHub

Business & Tools: Business Analysis, Workflow Automation, Power BI, Excel, VBA, MS Access, Minitab, Microsoft Office, Scrum

Languages: English (Advanced, B2), German (Beginner, A2)
